## INFORMATION SECURITY MANAGER POSITION REQUIREMENTS

### 1. Job Description

The purpose of this role is to develop, manage and implement a strategic information security plan to include people, process and technology solutions and to drive forward appropriate standards to support the Information Security strategy.

#### **Key responsibilities for this role include:**

- Develop & maintain information security policies, standards, guidelines and oversee the dissemination of security policies and practices;
- Respond to enquiries from staff and provide security advice as required;
- Make recommendations for security tools and services;
- Actively detect and identify security weaknesses and determine the required remediation steps;
- Installation and successfully management of security products and technologies;
- Leads all certification programs surrounding applicable industry compliance standards;
- Manages the security of information systems assets and the protection of systems from intentional or inadvertent access or destruction;
- Conducts penetration testing and vulnerability assessments of applications, operating systems and/or networks;
- Monitor changes and trends in the threat landscape to enable proactive security controls.

### 2. Required Education

Bachelor's Degree in Information Security, Information Technology, Cybersecurity or related field.

### 3. Required Skills + Working Experience

➤ Four years minimum experience in cybersecurity, information security, and/or information technology;

➤ Understanding of information security principles and best practice (e.g., ISO27001 and ISF Standards of Good Practice for Information Security);

➤ A market understanding of industry trends for cybersecurity, risk, threat intelligence and governance

➤ Understanding information security concepts (security controls, vulnerability, exploitation, etc.)

➤ Understanding of basic networking protocols such as TCP/IP, DNS, HTTP, HTTPS;

➤ Strong administrative skills in OS (Windows and Linux) and cloud environments administration

#### **4. Personal Qualities**

➤ Analytical mind;

➤ Strong communication skills and ability to work in a team;

➤ Excellent time management;

➤ Comfortable interacting with various levels of leadership and coworkers;

➤ Self-motivated, enthusiastic, and passionate about Information Security;

➤ Desire to move forward and improve your professional skills;

➤ Ability to manage many important projects simultaneously.

#### **5. Certification (What certificates are desirable?)**

Candidates for the position of information security manager must have at least one of the following industry certifications:

➤ Certified Information Systems Auditor (CISA);

➤ Certification Information Security Manager (CISM);

➤ Certified Information Systems Security Professional (CISSP).
